The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

(1) *A form of representation of data that is independent of machine-oriented structures and encodings and also of the physical representation of the data.* (Dictionary.com 2012)

(2) *The set of constructs and associated rules to create well-formed models.* (Created for SEBoK)

Sources

<http://dictionary.reference.com/browse/abstract%20syntax> (accessed: September 07, 2012).

(2) This definition was developed for the SEBoK v. 1.0.

Discussion

None.

SEBoK v. 2.4, released 17 May 2021
