

Development of SEBoK v. 1.4

Development of SEBoK v. 1.4

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

This version of the SEBoK was released 29 June 2015. This is a minor release of the SEBoK which includes changes related to ISO/IEC/IEEE 15288:2015 standard, updated articles in the areas of System Architecture, Life-Cycle processes, System of Systems, Competencies, Ethics and MBSE, as well as three new case studies.

Content and Feature Updates for v. 1.4

Summary of changes for SEBoK v1.4, see letter from the editor for a wider discussion of the changes and future plans.

A small but significant change has been made in SEBoK Part 2. This has been renamed from Systems to Foundations of Systems Engineering. This change reflects the focus of part 2 on the wider knowledge sources which underpin and enable good SE practice. The Part 2 Introduction and What is a System? articles has also been updated to reflect this focus.

The most significant change to the SEBoK for v1.4 is in Part 3: SE and Management. A number of the technical and project process articles in SEBoK have been updated to reflect the revisions of ISO/IEC/IEEE 15288:2015. This

includes update of all those articles which reference the standard to update the citation.

Changes to ISO/IEC/IEEE 15288 are more strongly focused on the relationships between system architectures and requirements; and on the transformation of business strategy into levels of stakeholder and system needs and requirements. To better describe how these process activities relate to each other and to the selected life cycle model for a SoI, we have brought together overview material on life cycle, life cycle process relationships and enterprise application into a new Knowledge Area in Part 3.

The Introduction to Life Cycle Processes KA contains 3 new articles:

- Generic Life Cycle Model, brings material from the life cycle models KA forward to describe a generic life cycle model needed to enable to discussions of life cycle processes. The details of available life cycle models remain in the Life Cycle Models KA.
- Applying Life Cycle Processes discusses overlapping views of the concurrent, iterative and recursive inter-relationships between SE life cycle processes, as a foundation for the more details discussions in concept definition, system definition and system realization.
- Life Cycle Processes and Enterprise Need provides and overview of how SE requirements, architectures and life cycles concepts (describing development, operation, support, etc.) can be related to enterprise organization, strategy and plans in a generic way. This again provides a foundation for more detailed discussions in Part 3.
- The introduction articles for concept definition and system definition have been updated to reflect the changes below. Some more explicit reference to model based SE (MBSE) have been added to these articles, and to the Structure of the SEBoK and *Relevant Standards articles*

The other specific changes to articles within part 3 are summaries below:

- The Business or Mission Analysis and Stakeholder Needs and Requirements articles have been updated to better align with changes to the ISO/IEC/IEEE 15288 (ISO 2015) standard.

- Two new SEBoK articles System Architecture and System Design have been added to reflect similar revisions to the standard and replace the previous article on architectural design. The System Requirements article has also been updated to better align with these related changes.
- The Logical Architecture Model Development and Physical Architecture Model Development SEBoK articles remain (with a slight name change). They now describe the development of commonly used architecture models in more detail.
- In addition the measurement article has been updated as part of the normal review of references and source material by identified subject matter experts.

Some other small changes have been made to the following articles:

- Part 4 Applications of SE: the Systems of Systems and Socio-Technical Features of SoS articles have been updated with newer material of SoS definitions and characteristics.
- Part 5 Enabling SE: the Roles and Competencies and Assessing Individuals articles have been updated with additional sources on competencies and individual knowledge and skills. The Ethical Behavior article has a new section on responsibility to society.
- Part 7 Implementation Examples: Three new case studies have been included: Global Positioning System Case Study, Design for Maintainability, Complex Adaptive Operating System and the Matrix of Implementation Examples has been updated

SEBoK v. 1.4 Authors

Editors (in bold) and Authors who contributed materials specifically to the v. 1.4 products are listed in Table 1, below.

Table 1. SEBoK v. 1.4 Authors. (SEBoK Original)

SEBoK Part	Editors and Authors
Part 1	Ariela Sofer , <i>George Mason University (USA)</i> , Sanford Friedenthal (USA)
Part 2	Janet Singer (USA), Richard Adcock, <i>Cranfield University (United Kingdom)</i> , Sanford Friedenthal (USA)

- Part 3 **Garry Roedler**, *Lockheed Martin*(US), Mike Ryan, *UNSW* (Australia), Jack Stein, (USA), Alain Faisandier, *Association Francaise d 'Ingenlerie Systeme* (France), Ron Carson (USA).
- Part 4 **Judith Dahmann**, *MITRE Corporation* (US), **Michael Henshaw**, *Loughborough University* (UK).
Heidi Davidz, *Aerojet Rocketdyne* (US), **Emma Sparks**, *Cranfield University*(United Kingdom), **Rick Hefner**, *California Institute of Technology* (USA), Timothy Ferris, *University of South Australia* (Australia), Rabia Khan, *Naval Postgraduate School* (USA), Corina White, *Naval Postgraduate School* (USA), Clifford Whitcomb, *Naval Postgraduate School* (USA), Barbara Berlitz, *Naval Postgraduate School* (USA)
- Part 5 **Brian Sauser**,*University of North Texas*(USA), **Brian White**,*CAU>SE*(USA), John Findlay, *Maverick and Boutique* (Australia), Kevin Forsberg, *OGR Systems*, (USA).
- Part 7

SEBoK v. 1.4 Editors

The Editorial Board for v. 1.4 is listed in Tables 2, 3, and 4 below.

Editorial Board

The SEBoK Editorial Board is chaired by an Editor in Chief, supported by a group of Associate Editors.

Table 2. SEBoK v. 1.4 Leadership. (SEBoK Original)
BKCASE Editor in Chief

Richard D. Adcock
Cranfield University (UK)
 richard.adcock@incose.org
 Responsible for the appointment of SEBoK Editors and for the overall content and coherence of the SEBoK.

Each Editor has his/her area(s) of responsibility, or shared responsibility, highlighted in the table below.

Table 3. SEBoK v. 1.4 Associate Editors. (SEBoK Original)
SEBoK Part 1 SEBoK Introduction

Ariela Sofer

George Mason University (USA)

asofer@gmu.edu

Responsible for Part 1

SEBoK Part 2: Foundations of Systems Engineering**Cihan Dagli**

*Missouri University of
Science & Technology
(USA)*

dagli@mst.edu

Responsible for the
Systems Approach Applied
to Engineered Systems
knowledge areas

Dov Dori

*Massachusetts Institute of
Technology (USA) and
Technion Israel Institute of
Technology (Israel)*

dori@mit.edu

Responsible for the
Representing Systems with
Models knowledge area

Duane Hybertson

MITRE (USA)

Jointly responsible for the
Systems Fundamentals,
Systems Science and
Systems Thinking
knowledge areas

Janet Singer (USA)

Jointly responsible for the
Systems Fundamentals,
Systems Science and
Systems Thinking
knowledge areas

Mike Yearworth

University of Bristol (UK)

Jointly responsible for the Systems Fundamentals,
Systems Science and Systems Thinking knowledge areas

SEBoK Part 3: Systems Engineering and Management**Barry Boehm**

*University of Southern
California (USA)*

boehm@usc.edu

Jointly responsible for the
Systems Engineering
Management and Life Cycle
Models knowledge areas

Kevin Forsberg

OGR Systems

Jointly responsible for the
Systems Engineering
Management and Life Cycle
Models knowledge areas

Gregory Parnell

University of Arkansas (USA)

gparnell@uark.edu

Responsible for Systems
Engineering Management
knowledge area.

Garry Roedler

Lockheed Martin (USA)

garry.j.roedler@lmco.com

Responsible for the Concept
Definition and System
Definition knowledge areas.

Ricardo Valerdi

University of Arizona (USA)

rvalerdi@email.arizona.edu

Responsible for the System
Realization knowledge area.

Ken Zemrowski

TASC

kenneth.zemrowski@incose.org

Responsible for the Systems
Engineering Standards
knowledge area.

SEBoK Part 4: Applications of Systems Engineering

Judith Dahmann*MITRE Corporation (USA)*

jdahmann@mitre.org

Jointly responsible for

Product Systems

Engineering and Systems of

Systems (SoS) knowledge

areas

Rick Hefner*California Institute of**Technology (USA)*

Responsible for the Service

Systems Engineering

knowledge area.

Michael Henshaw*Loughborough University**(UK)*

M.J.d.Henshaw@lboro.ac.uk

Jointly responsible for

Product Systems

Engineering and Systems of

Systems (SoS) knowledge

areas

James Martin*The Aerospace Corporation*

james.martin@incose.org

Responsible for the

Enterprise Systems

Engineering knowledge

area.

SEBoK Part 5: Enabling Systems Engineering**Heidi Davidz***Aerojet Rocketdyne (USA)*

heidi.davidz@rocket.com

Jointly responsible for the

Enabling Individuals and

Enabling Teams knowledge

area

Emma Sparks*Cranfield University*

Jointly responsible for the

Enabling Individuals and

Enabling Teams knowledge

area

SEBoK Part 6 Related Disciplines**Alice Squires***Washington State University (USA)*

alice.squires@wsu.edu

Responsible for Part 6

SEBoK Part 7 Systems Engineering Implementation Examples**Brian Sauser***University of North Texas**(USA)*

brian.sauser@unt.edu

Responsible for Part 7:

Systems Engineering

Implementation Examples,

which includes Case Studies

and Vignettes

Brian White*CAU>SE (USA)*

bewhite71@gmail.com

Responsible for Part 7:

Systems Engineering

Implementation Examples,

which includes Case Studies

and Vignettes

Graduate Reference Curriculum for Systems Engineering (GRCSE)**David H. Olwell***Naval Postgraduate School (USA)*

Senior Editor for GRCSE.

The Assistant Editors provide general editorial support across all topics. They assist both with content improvement and production issues.
