

# Lean Systems Engineering (LSE) (glossary)

---

lean systems engineering (lse)

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

*(1) The application of lean principles, practices, and tools to SE to enhance the delivery of value to the system's stakeholders. (Oppenheim, Murman, and Secor 2011)*

*(2) Lean Systems Engineering (LSE) is the area of synergy between lean thinking and SE, with the goal to deliver the best life-cycle value for technically complex systems with minimal waste; under the lean SE philosophy, mission assurance is non-negotiable, and any task that is legitimately required for success must be included, but it should be well-planned and executed with minimal waste. (INCOSE 2012)*
