

System Capability (glossary)

system capability

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

The ability of a system to execute a particular course of action or achieve a desired effect, under a specified set of conditions. (Created for SEBoK)

Source

This definition was developed for the SEBoK.

Discussion

In the SEBoK, the terms "capability" may be used in place of "system capability", implying a capability discussed within a systems context. Please see the discussion of capability. It is important to note that "system capability" is sometimes used to distinguish between an "organizational capability" within the SEBoK.

SEBoK v. 2.10, released 06 May 2024
