

Systems Thinking (glossary)

From SEBoK
systems thinking

(1) An epistemology which, when applied to human activity is based on four basic ideas: emergence, hierarchy, communication, and control as characteristics of systems. (Checkland 1999)

(2) A process of discovery and diagnosis - an inquiry into the governing processes underlying the problems and opportunities. (Senge 1990)

(3) A discipline for examining wholes, interrelationships, and patterns utilizing a specific set of tools and techniques. (Senge 1990)

Discussion

Definition (1) is the System Science view, defining system thinking as a "theory of knowledge, esp. with regard to its methods, validity, and scope", based around seeing the world as systems.

Definitions (2) and (3) focus more on systems thinking as a collection of methods for dealing with system problems. This aspect of systems thinking relates directly to the Systems Approach defined in the SEBoK.
